Realtek RTL8188EU USB Wireless Driver is a cheap, convent WiFi adapter in case of a broken wireless card or computer that simply requires wireless WiFi. However, the driver for this device is strangely missing from driverpacks and has little documentation. So, I'm sharing my copy of the drivers here. Surprisingly, such a generic, generic device doesn't seem to have an easy place to access drivers. However, it's great to back up these drivers online. Features: -150Mbps WiFi Internet Speed -Standard: IEEE 802.11n, IEEE 802.11g, IEEE 802.11b -Supports 64/128 bit WEP, WPA encryption -Effective working distance: 100 meters farther indoors and 150 meters further outdoors -Compatible with RTL8188EU and 8188SU Requirements: Windows XP or later instructions and later: Unzip files. 2. Start set up.exe 3. Choose the right options. Components: TL-WN725N_V2_130326 Notes: -The driver provides no wireless utility developed by the manufacturer due to having a buggy. The version that includes this configuration continues to display this message non-stop. There is also an old version of the driver that may contain support for Windows 2000 (completely unverified).
